

Cargill Exhibition Stand

Design Brief: A contemporary looking design to suit a 6m x 3m corner stand booth space.

The stand had to be modular, self-build and easy to transport. The design proposal included an easy to assemble aluminium frame structure with SEG printed fabric panels.

A storage room with a lockable door was part of the client brief. Lighting included downlit LED lamps throughout and a centre piece backlit LED fabric panel to enhance the presentation of the company Logo.
