

Assembly Instructions

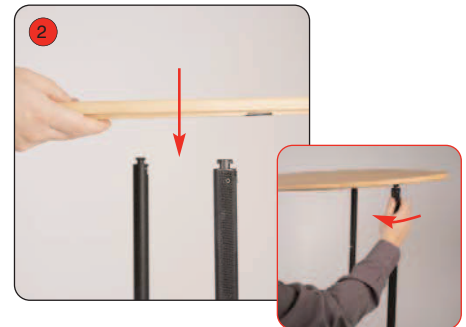

Kit includes: Top, base, tambour wrap, internal shelf and 3 twist & lock poles (2 poles have hook fastener attached)

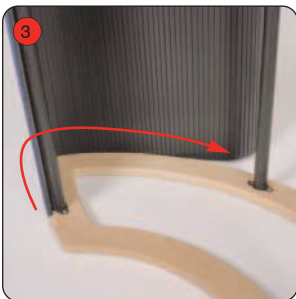

Place the two poles with hook fastener into the fittings located at the rear of the base. Place the remaining pole into the fitting at the front of the base. Twist to lock the poles into place.

Ensure the poles have their slots nearest to the top of the unit.

Lower top onto the poles. Unfasten each pole and then refasten to secure the top to the base.

Attach the vertical edge of the wrap to the pole using loop fastener. Feed the wrap around the base, fitting into the groove securely.

Feed the wrap around the top at the same time as the base to ensure an even fit.

Finally fit the shelf into the unit, locating onto the 3 pole slots.
