

## ProSys Exhibition Stand

**Design Brief:** A contemporary looking design to suit a 7m x 5.5m corner stand booth space. The stand had to be modular, self-build and easy to transport. The stand had to be capable of converting to a straight backwall stand to suit an 8m x 6m space. The design proposal included an easy to assemble aluminium frame structure with SEG printed fabric panels. Lighting included downlit LED lamps throughout and a centre piece backlit LED fabric panel to enhance the presentation of the company Logo.
